

**FOR IMMEDIATE RELEASE**

**New Residential Visitor Management offers flexible mobile access and PIN code options for residents to manage their visitors**

**INDIANAPOLIS, July 19, 2021** – Today’s multihousing residents have busy lifestyles and need an easy way to manage the increased frequency of deliveries and visits from service providers or family and friends. dormakaba’s new Community™ Residential Visitor Management puts access control in the hands of the resident. Using the newly enhanced BlueSky app, they can provide simplified access to these temporary visitors or recurring guests.

Property managers and residents can provide access to exterior and common areas with enhanced security through the creation of mobile keys and PIN codes. Mobile keys are also available on unit doors.

“The Community access management software solution is specifically developed for multihousing properties and meets the expectations of today’s renters for simplified access management,” said Michael Kincaid, Global Business Owner, Lodging Systems. “The new Community Residential Visitor Management solution allows residents to manage mobile access and PIN codes which gives them the flexibility they demand and property managers the control they need.”

Residents can create and manage PIN access to their property including single use, date and time specific use or multiple use access. They can send PIN codes verbally, by text, or by email. Residents can use this new functionality for takeout food delivery, deliveries for online shopping, cleaners, dog walkers, visits by family and friends, and maintenance repairs.

Community empowers property managers to manage access throughout the entire property without compromising security or operational efficiency.

A full range of features meet the evolving access requirements in multihousing including:

- Generate and manage PIN and mobile access credentials through dormakaba’s enhanced BlueSky app
- Create single use PINS for one-off visitors to multi-use pins for longer term or recurring use
- Supports long distance reader designed for parking and service areas and improved disabled touchless access
